

LOCK YOUR BIKE . . . THE RIGHT WAY

Don't let the next one be yours!

Here are three ways you can have Ultimate Security for your bike.

Place your bike against a well anchored object, like a pole or parking meter, with chainring facing out.

Remove your front wheel and place it by your rear wheel.

JOIN THE REVOLUTION... REGISTER YOUR BIKE TODAY

- Kryptonite has joined with Bike Revolution to provide **FREE** global bike registration
- Registered bikes have a **greater** recovery rate
Are you linked to your bike if it is stolen?
- Register today at www.bikerevolution.org/kryptonite
- What you'll need to register:
 - Your serial #
 - Contact details
 - Date/Location of purchase (optional)
 - Bike description
 - Photos (optional)
 - Identifying marks (optional)

U-Lock: Place U-Lock shackle around the pole and through both seat stays (if frame will allow) and the two wheels.

3

Cable: Wrap cable through both wheels, around frame and a pole or fixed object.

Kryptonite® Recommends

For extra security, place the U-Lock shackle around the pole, your bike frame and through your rear wheel. Loop a cable around your front wheel, bike frame, and onto your U-Lock shackle.

LOCK UP . . . DO'S & DON'TS

DO'S

- Make sure bike cannot be lifted over the object it is locked to.
- Keep your bike locked at all times.
- Lock your bike in a well lit area.
- Position your lock with key hole facing down.
- Create a snug fit with wheels and frame so that there is little room in the U-portion of the lock for thief's tools.

DON'TS

- Lock your bike to itself, or to objects that can be easily cut.
- Lock your bike in the same area all the time.
- Position lock near the ground. Thieves can attempt to leverage or crush the lock.

It is suggested that you spend 10% of the total cost of your bike on security
